

Series Micro 9 / 18 Romaco Macofar

The Romaco Macofar Micro 9 and 18 are machines suitable for filling sterile pharmaceutical powders into vials under aseptic conditions. The Micro range of intermittent motion machines offers mechanical speeds ranging from 9,000 to 18,000 vials per hour. They are renowned for their reliable performance in aseptic lines for dosing sterile powders into round glass vials sealed with rubber stoppers. Designed for cGMP compliance, due to their balcony design, the Micro machines are recognized worldwide as leading powder microdosing machines, carrying on the decades of Macofar tradition.

Highlights

- Simple, fast and repeatable changeover.
- Automatic height adjustment of filling and closing groups, no manual adjustments required.
- Product format data is recorded in an electronic database and can be recalled via the touch screen.
- Nitrogen flushing before, during and after filling
- Liquid filling group for media fill test
- Air drying unit to reach a controllable humidity percentage in the filling area.
- Vertical laminar flow over the dosing and stoppering stations with recycle

Technical Data	Micro 9	Micro 18
Output – single dose (vials/hr)	9,000	18,000
Vial dimensions diam	16 – 52 mm	
Vial dimensions h	35 – 120 mm	
Minimum dose (Min. dosages can change according to the powder specific weight)	50 mg	
Maximum dose with single dose (Max. dosages can change according to the powder specific weight)	1,500 mg	
Dosing disc	one	
Dosing port per disk	12	12+12
Power consumption	9kW 1.8 kW F.L. 1.5 C.P.	
Compressed air for powder ejection	70 (l/min)	120 (l/min)
Vacuum pump	100 m ³ /h	
PLC standard	Siemens	
Net weight (kg)	2,000	2,100
Gross weight (kg)	2,300	2,400
