

623 from Romaco Noack

The Noack 623 intermittent motion blister machine with platen sealing makes it synonymous with dependability and versatility – qualities which continue to see it setting the standard in the contract packaging sector and other applications that require small batches and quick changeovers. The user-friendly Noack 623 blister machine is ideal for packing tablets, capsules, caplets, ampoules, vials and syringes.

Furthermore, optimal usage of machine time is achieved due to a combination of quick and easy adjustment, fast changeovers, total accessibility throughout the machine, large foil/film reels requiring fewer changes and electronically stored format data.

Highlights

- Processes all common thermoformable foils and films
- Alu forming even for large cavities
- Upgrade options to increase productivity: automatic feeding systems, filling inspection and ejection station, print mark registration, blister transfer for in-line operation with cartoner
- QuickAdjust – auto-adjustment for sealing, coding, perforation and die-cutting aligned with the blister position
- Easy operation and setup
- Optimised machine availability and low life cycle costs

Technical Data	Noack 623
Maximum output (blister/minute)	420
Maximum blister tracks	6
Maximum foil width (mm)	235
Maximum forming area (mm)	225 x 158
Maximum forming depth (mm)	25
Maximum forming foil reel diameter (mm)	700
Maximum lidding foil reel diameter (mm)	300
Machine dimensions (mm), L x W x H	4,600 x 1,000 x 2,200
Weight (kg)	2,200
Remote Assist connection	Ethernet
PDA interface	OPC UA
